### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lori A. Gordon, Registration No. 50,633, on July 2, 2008.

The application has been amended as follows:

Claims **28 and 39**:

28. (currently amended) A packet processing system comprising:
- at least one media access controller for receiving a plurality of packets;
  - at least one data memory for storing security association information; and
  - a cryptographic processing module, wherein the cryptographic processing module includes:
    - a policy lookup unit configured to identify a flow associated with each of the received plurality of packets by determining a flow element address for the packet, retrieving a first flow element using the flow element address, wherein the first flow element includes a plurality of flow entries, determining whether a selector in the set of security association handle selectors is present in one of the plurality of flow entries, and retrieving a second flow element if a selector in the set of security association handle selectors is not present in one of the plurality of flow entries and further configured to retrieve a security association for each identified flow;
    - a merge data unit coupled to the policy lookup unit configured to merge a portion of the security association retrieved by the policy lookup unit with the associated packet,
    - a plurality of cryptographic processors, each coupled to the merge data unit for performing cryptographic operations on the merged packets.
39. (currently amended) A method for determining security association information in a cryptographic processor comprising:
- receiving a security association handle for a packet, wherein the security association handle includes a set of selectors;

identifying a flow entry for the packet, including:  
determining a flow element address for the packet [[:]] ,  
retrieving a first flow element using the flow element address, wherein  
the first flow element includes a plurality of flow entries [[:]] ,and  
~~identifying a flow entry having~~ determining whether a selector matching a  
selector in the set of security association handle selectors is present in one of the  
plurality of flow entries [[:]] .  
retrieving a second flow element if a selector in the set of security  
association handle selectors is not present in one of the plurality of flow entries;  
retrieving security association information using the identified flow entry; and  
transmitting at least a portion of the retrieved security association  
information to a cryptographic processing engine.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims **1, 14, 28, 39** are allowed based on the following:

Prior art does not disclose: (a) retrieving a first flow element using the flow element address, wherein the first flow element includes a plurality of flow entries, (b) determining whether a selector in the set of security association handle selectors is present in one of the plurality of flow entries; and (c) retrieving a second flow element if a selector in the set of security association handle selectors is not present in one of the plurality of flow entries.

Claims **2 - 4, 6, 32 - 35** are allowed due to allowed base claim **1**.

Claims **15 - 17, 19, 36, 37** are allowed due to allowed base claim **14**.

Claims **29, 38** are allowed due to allowed base claim **28**.

Claims **40 - 42** are allowed due to allowed base claim **39**.

So as indicated by the above statements, Applicant's arguments have been considered persuasive, in light of the set of claims with limitations as well as the enabling portions of the specification. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
